## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of DE 199 48 366 A1 or WO 2004/023949. Both DE '366 and WO '949 references disclose the claimed invention except for such design features as the specific detecting means claimed, for example, based on the container detected, etc. It would have been an obvious matter of design choice to have provided either reference with such design detecting features as claimed, since applicant has not disclosed that such obvious design choices solve any specific problem and it appears that the invention would perform equally well. The remaining limitations would then have been obvious design choices only.

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
